📍 Ahmedabad, Gujarat, India

SUMMARY

Angular Developer with 4+ years of experience building scalable enterprise web applications using Angular (8–19), TypeScript, JavaScript, RxJS, Signals, REST APIs, and Angular Material. Experienced in reusable component development, API integration, state management, performance optimization, lazy loading, route guards, and debugging. Immediate joiner with experience in healthcare, finance, and e-commerce domains.

PROFESSIONAL EXPERIENCE

Angular Developer

By People Technologies.

📅 April 2022 – Present

📍 Ahmedabad, India

- Created an Angular-based healthcare platform 'Medbound' with a responsive and user-friendly admin panel to manage and streamline healthcare operations. The application includes modules for user management, data handling, and secure API integration to support different healthcare services on a single platform.
- Built role-based permission systems that enabled controlled access to features and data based on user roles and responsibilities.
- Enhanced user experience through custom components, reusable UI elements, and optimized data handling.
- Collaborated with cross-functional teams, including UX/UI designers, product managers, and developers, to deliver feature-rich solutions.
- Mentored and guided junior developers, promoting best practices and continuous learning within the team.

EDUCATION

Lakshmi Narain College of Technology

MCA in Computer Science

📅 July 2017 - June 2020

📍 Bhopal, India

CGPA = 8.00

NIIT (Kuvempu University)

Bachelor of Information Technology

📅 June 2013 – August 2016

📍 Shimoga, India

Percentage= 63.44%

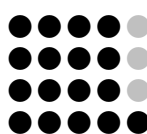

SKILLS

Angular (8–19), Typescript, JavaScript

RxJS, NgRx, Signals

HTML, CSS, Bootstrap, Angular Material

Gitlab, Github, Jira, Postman, VS Code

CERTIFICATIONS

- NPTEL: PROGRAMMING IN C.
- Coursera: OBJECT ORIENTED PROGRAMMING IN JAVA.
- Coursera: Build Your Portfolio Website with HTML and CSS.

PROJECTS

1. Swift Assets

It is a web based application and manage assets.

Used Technologies: - Angular 8-19, RxJS, TypeScript, HTML, CSS, Angular Material, Bootstrap, REST APIs, Metronic v6

Roles and Responsibilities

- Developed new features and enhanced existing modules based on business requirements and helping the team deliver new features faster.
- Developed scalable Angular services and reusable UI components, reducing duplicate code by 20%.
- Resolved complex UI and API integration issues through debugging, significantly reducing bugs.
- Contributed to migration of application from Angular 8 to 19 by upgrading dependencies and refactoring legacy code.
- Monitored critical issues and took corrective actions.

2. Medbound (Healthcare Platform)

A web-based healthcare platform.

Used Technologies: - Angular 17, RxJS, TypeScript, HTML, CSS Angular Material, Bootstrap, REST APIs, NgRx

Roles and Responsibilities

- Developed responsive admin dashboards and patient management modules.
- Reduced unnecessary API calls by nearly 35% using RxJS operators such as switchMap and debounceTime.
- Coordinated with frontend, backend, and QA teams to deliver new features and improve application performance.

3. Online Shopping Application

This web application manage all the products and customer details.

Used Technologies: - Angular 12, RxJS, TypeScript, CSS, Bootstrap, REST APIs

Roles and Responsibilities

- Developed core e-commerce modules including product listing, cart, checkout, and order management.
- Developed reusable components and shared services, reducing feature development time by approximately 20
- Integrated REST APIs for product data, order processing, and user interactions, ensuring smooth end-to-end functionality.
- Optimized rendering and change detection to enhance application efficiency and user experience.
